## WINTER IN THE RESORT

The official ski season beginning combined with a day programme in the **Jasná resort** is planned for **Saturday 2<sup>nd</sup> December 2023**. The ski resort of Jasná located on the pistes of Mt Chopok promises unforgettable skiing adventures in the 2023/2024 winter season. The biggest Slovak ski resort with top-class winter sports conditions offers great amusement, modern cable cars and a wide choice of events. 50 km of perfectly groomed pistes with a modern snowmaking system guarantee skiing on both sides of Mt Chopok – south and north for at least 5 months per year. There are pistes of various difficulty levels – from easy ones to difficult, black pistes. 20 cable cars, chairlifts and ski lifts with a transport capacity of over 32,000 passengers per hour, including the 24-person wind-resistant Funitel cable car and 15-person gondolas that link the northern and southern sides of the mountain symbolise maximum comfort while skiing. The queen of mountain restaurants – panoramic Rotunda welcomes clients with endless views from the second-highest peak of the Low Tatras, a sunlit terrace and hotel rooms at the altitude of 2,004 metres.

Jasná, the home resort of Olympic Champion Petra Vlhová, is going to welcome the best female skiers of the world at **Audi FIS Ski World Cup Jasná 2024** (20<sup>th</sup> – 21<sup>st</sup> January 2024) after three years again. Top freeriders meet there too because the **Freeride World Tour** has a stop in the resort regularly (on 21<sup>st</sup> - 24<sup>th</sup> March 2024 this year). All fans of skiing in off-piste terrain love twelve wide freeride zones that are accessible comfortably by cable cars, which is possible only in a few resorts all around the world and makes Jasná truly unique. The offer includes a trendy renewed **snow park** designated for beginners as well as experienced skiers, the popular Fun Zone with easy snow obstacles suitable for all age groups, morning **Fresh Track** on untouched ski pistes before the resort starts to operate officially.

The most important **cable car in the resort – Funitel** counts to top modern world-class technological facilities. The cabins are fixed on two ropes, which increases safety and allows operation in strong wind of **up to 120 km/hour**. The journey to the summit begins at the Priehyba station (upper station of the 6-seater Záhradky – Priehyba chairlift) and ends on top of Mt Chopok after 6.5 minutes. The transport capacity is 2,480 passengers per hour, each of the 22 cabins surmounts a distance of more than 2,000 metres and an altitude difference of 655 metres. When compared to chairlifts, the transport speed has increased to 7 m/s. Thanks to a EUR 17 mil. investment resort visitors can now **travel with a new 15-person Doppelmayr cable car from Biela púť to Priehyba on the northern side of the mountain**.

There are two more **15-person cable cars** that link the resorts of Chopok North and Chopok South – **Krupová – Kosodrevina and Kosodrevina – Chopok South**. They are similar to the popular orange Grand Jet cable car in the area of Otopné (running on the route: Grand – Brhliská) on the northern side, but these are bigger, meant for 15 passengers. The transport capacity is 2,800 people per hour and the overall altitude difference is 920 metres.

The Jasná resort plans to continue increasing the safety on ski pistes, marking ski touring corridors, educating ski tourers, managing ski patrols. The professional SNOWsat slope and fleet management system with snow depth measurement and satellite-guided positioning of snow groomers is going to be used actively as well. To inform clients in Jasná about everything they need to know, a central resort radio has been installed at selected cable cars. Ecology is a significant management element in Jasná as well – support of ecological shuttle busses, waste separation at cable car lower stations and in resort facilities, modern energy-saving technologies, a new cable car as an ecological supply alternative instead of snow groomers, tableware made of ecological materials such as paper or bamboo or porcelain instead of disposable plastic in gastronomy facilities on ski pistes.

## FLEXIBLE SKI PASS PRICING

The pricing system in the 2023/2024 winter season in Jasná will follow the last year's model. Inspired by the flight ticket selling system, it enables skiers to buy ski passes at better prices in advance when compared to prices at regular ticket offices at the last minute. The shopping process at [www.gopass.travel](http://www.gopass.travel) will be "lively" and constantly changing, with rates calculated automatically by the programme. The main aim is to spread skiers equally around individual resorts during the whole season. This is why ski passes will cost more in the busiest periods, and less when there are not as many clients in resorts. The motto: **"The sooner you buy, the better is the price"** is still the key and a chance for clients who can make plans in advance to be rewarded with better prices than those of regular 1-day ski passes.
